

The dialogue between the natural and the artificial is a dominant theme in Patricia Urquiola's work and aesthetic. It is particularly visible in the Foliage collection, a family of soft chairs created especially for residential use.

The key players are a two-seater sofa and an arm chair, that seem to have grown "naturally": the painted metal frame provides support for a comfortable seat reminiscent of the crown of a tree, with top-stitched leaves. The covers are available in cloth or Trevira fabrics in a variety of shades that can be combined in original ways with the white, black or red legs.

In order to better satisfy the needs of common areas, Foliage is also available in a personalised version with fabrics provided by the client, for orders of at least 10 items.
