OKA TRAY

The Oka tray is inspired by traditional Japanese serving trays, often produced in wood or bamboo.

Transforming this well-known form into a new material, in this case solid fiber concrete, a certain heaviness and a refined texture of the surface is added, without compromising on the recognizable shape. With its sculptural and architectural shape, it can be used for various decoration purposes or stand alone as a piece of art.

As it is a natural product, the colours may vary a little. Not 100% waterproof.
