**Igman Lounge Chair & Ottoman**

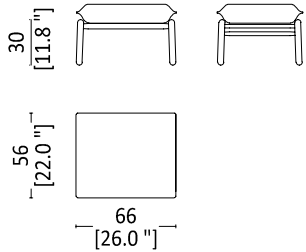

Designed by Harri Koskinen

---

Igman Lounge Chair & Ottoman are designed to provide the comfort that enables a drift into the uninterrupted state of coffee-culture idleness. The softly rounded structure of Igman Lounge Chair made in solid wood with hand-carved edges of the armrests creates a feeling of warmth and a strong, yet unassuming character. One's fingers are irresistibly drawn to touching the hand-carved grooves on the underneath of the armrests, an experience that contributes to the overall feeling of comfort. The chair is also available without armrests, upholstered in tanned saddle leather and a choice of fabrics. The ottoman was designed to follow the typology of the Igman Lounge Chair and it complements the chair both visually and in terms of providing the additional comfort that enables one to easily doze off without needing a bed. The ottoman can also be used for sitting, while two or more ottomans can be combined into a bench system.

---

Upholstery: uncoated tanned saddle leather (note: the leather will get a patina and darken with age) and a choice of fabrics by Kvadrat™.
